To succeed in a supportive and growth-oriented environment that enables continuous self-development while helping me achieve both personal and organizational goals.

EDUCATION QUALIFICATION

Course	Year of Passing	Name of Institute	Board	CGPA/ Percentage
B.Tech – CSE	2017	SRM University	SRM University	9.42
Class XII	2013	Kendriya Vidyalaya No. 1, Pune	CBSE	86.8%
Class X	2011	Kendriya Vidyalaya No. 1, Pune	CBSE	83.6%

TECHNICAL SKILLS

Web/Application Servers	:	Tomcat, JBoss, Websphere
Distributed Object Technologies	:	Java EE
Databases	:	MySQL, PostgreSQL, MongoDB
Development Tools	:	Eclipse, STS, VS code, Atom, EdgeConnect, Docker
Server Languages	:	Servlets, JSP
Markup Languages	:	HTML5, XML
Scripting Languages	:	JavaScript, jQuery, typescript
Frameworks	:	Spring, Hibernate, React-JS
Versioning Tool	:	SVN, Git
AI Tools	:	Github Copilot, Spark Assist, RAG, Agentic AI

EXPERIENCE

Company	Duration (in yrs)	Duration	Location
S&P Global	1.5+ Years	Apr-2024 till present	Gurgaon
LTIMindtree	1.5+ Years	Aug-2022 to Apr-2024	Chennai
Aspire Systems	5+ Years	Jun-2017 to Aug-2022	Chennai

INTERNSHIP AND INPLANT TRAINING

- Internship at **Aspire Systems** in **Java** technology from Jan 2017 – Mar 2017.
- Undergone Inplant Training at **BSNL** on Telecommunication.
- Internship at **HEWLETT-PACKARD(HP)** COMPANY from Apr 2015 to Jul 2015.

TECHNICAL ACHIEVMENTS AND AWARDS

- GSD Award Q2 – 24
- Gen AI belt certifications (achieved all 3)
- Role Star Award

PROJECT DESCRIPTION

1. CCP – Content Creation Platform

Role	:	Developer
Tech Stack	:	React Js, Spring-Boot, AWS
Team Size	:	10
Software	:	Intelli-J Idea, VS Code, PostgreSql,

Description:

CCP is a comprehensive content management system designed to empower users to effortlessly create, publish, distribute, and manage a diverse array of content, including articles, blog posts, headlines, and more. These platforms provide an extensive suite of features and services to support users in producing top-notch content efficiently and effectively.

Responsibilities handled:

- Involved in technical discussions, story analysis, code review etc.
- Responsible for developing restful web services and user interface
- Analyzing the production bugs and providing concrete fixes
- Actively engaging with clients and business to understand the requirements.

2. BiDB – Customer Onboarding

Role	:	Developer
Tech Stack	:	React (front-end), Mambu, Spring and Firebase
Team Size	:	4
Software	:	Eclipse, STS, Visual Studio, Docker, JBoss

Description:

Customer onboarding is the pivotal process through which financial institutions establish new relationships with clients. It entails a series of steps aimed at collecting crucial client information and conducting thorough regulatory, legal, and screening due diligence, including identity verification checks.

Responsibilities handled:

- Involved in developing the features of specified modules.
- Responsible for coding, debugging and unit testing.
- Responsible for gathering the requirements from client side (PII & Step-Up).
- Actively engaging with end client to understand the business requirements.

3. DeliveryPedia

Role : Developer
Team Size : 3
Software : Eclipse, Tomcat Server, Wildfly Server, MySQL Workbench

Description:

This is a project management system which can keep track of the Statement of Work (SOW), Milestones achieved etc., and it is used to estimate the expenditure, revenue and to forecast any project(s) which may come from a client or from a particular location.

It displays all the information related to the projects in a company and helps the management to better analyze the project metrics and take useful decisions.

Responsibilities handled:

- Assigned to fix UI issues in certain modules
- Involved in fixing some of the functional implementations, UI issues and bugs
- Provide technical support to the team
- Explore on new Technologies which may be incorporated to the project

4. TEJAS-MPI (ISV Accelerator)

Role : Developer
Team Size : 5
Software : STS, Tomcat Server, Git Desktop, Mongo Client,
docker, maven, React Js
Architecture Flow : Microservices

Description:

Evaluation as a service and is a marketing tool which handles the assessment where the clients could provide their expectations for their project development say build tools, CI and get the appropriate suggestion over the project.

Responsibilities handled:

- Worked on Spring-boot for building restful web APIs.
- Involved in implementing the features of modules specified.
- Used Spring Data JPA in Data Access Layer to access and update information in the Mongo database.
- Actively participated in Agile development scrum as per the requirements and tasks.
- Involved in implementing the application as per Micro-Service pattern.

5. Banque Du Caire (Egypt)

Role : Developer
Team Size : 5
Software : STS, Alfresco, PostgreSQL, MySQL, Edge-Connect-6.2,
SVN, Oracle-11g

Description:

This project includes Retail, Corporate applications derived from TCIB R-18 product with the core banking implementation as Oracle Flexcube. Project also includes Back-Office and Website (CMS) for internally managing the users and content respectively.

Responsibilities handled:

- Actively engaging with end client to understand the business requirements.
- Involved in implementing the features of modules specified.
- Responsible for coding, debugging and unit testing.
- Responsible for creation of Restful APIs using Spring boot framework.
- Responsible for setting up the production environment (for CMS Website) and deploying the build war to the production server.
- Responsible for fixing the production issues.

PERSONAL SKILLS

- Team working skills
- Leadership Skills
- Time management skills
